Our Services

A "one-stop" take-up of projects from feasibility studies, through design, construction management and supervision, to operation and maintenance, institutional building and training of our client's staff.

We cover the complete spectrum of engineering sector including, water resources, water supply and waste-water, transportation, environmental services, power generation and supply, urban development project, management, education and training, and other specialist services.

We offer dedicated services using advanced management techniques, designed to ensure project completion within time, budget and performance criteria. Our range of services offering is multi-disciplinary and to suit the current infrastructure development requirements in Pakistan. We provide Lender's engineer's & Owner's engineer's services to major financial institutions and private sector clients.

Management

The firm operates on corporate basis through offices in Karachi, Lahore and Islamabad covering the whole country and to be easily available to our clients.

Every project is allocated to a designated project director and a manager with the essential technical team fully authorized for the day-to-day management and co-ordination of the work with associated cost control.

The firm operates under a well-defined quality system to ensure the technical excellence and reliability of services developed.

Our People

We create standards of technical excellence with our professional teams. Our senior staff includes internationally recognized experts in their fields and are available to advise on complex problems.

Our dedicated staff strength gives continual attention to the project and local offices for advisories, allowing our staff to develop a full understanding of client's problems and needs.

Professional technical staff includes engineers, planners, environmentalists, scientists, economists, architects, IT Specialists, educationalists and management specialists. Our reputation is built on effective and imaginative problem solving skills.

Our Clients

We serve the major international lending agencies, public and private agencies, industries, investors and developers. No project is too small or too large for us, although we have participated in some of the Pakistan's most prestigious development projects in recent years, we give the same level of attention to all assignments.

Our ability to interpret the widely varying needs of clients is based on a fine mix of care, experience, personal attention and appreciation of cost constraints.
